That's true. In reality there is no 100% pin, and there is no 100% fix. The actual condition is something in between. Depends on the bolt pattern you go for, the 2-Bolt Pin and 4-Bolt Pin allows more rotation, say 20~30% fix and 70% pin, while anchor bolt spreading out can restrain more rotation, say 70% fix and 20~30% rotation.

Pinned connection at base plate - Structural engineering

A screw is a type of fastener, in some ways similar to a bolt (see Differentiation between bolt and screw below), typically made of metal, and characterized by a helical ridge, known as a male thread (external thread).

Screw - Wikipedia

dane, Just curious about something I learned â€œ one design called for 1 1/2â€³ Gr 8 bolt with 2200 ft-lb tightening torque. now the engineer claimed that by specifying a 1000 ft-lb tightening torque will be adequate based his calculation. my comment to him was that then donâ€™t use 1 1/2â€³ size bolt and go to a 7/8â€³ or whatever, so that I ...
