Welcome to the next generation of PCB library development. The Library Expert is the original IPC footprint automation solution, which is also flexible enough for the most advanced user-defined modifications to effortlessly create footprints from component data. It outputs individual parts or entire libraries to all major CAD formats (each available separately).

Sigrity Power DC Sign off with confidence Sigrity's PowerDC technology provides comprehensive DC analysis for today's low-voltage, high-current PCB and IC package designs. It is available with integrated thermal analysis to enable electrical and thermal co-simulation. Using PowerDC, you can assess critical end-to-end voltage margins for every device to ensure reliable power delivery.
