In modern times, the dialectic of thesis, antithesis, and synthesis has been implemented across the world as a strategy for organizing expository writing. For example, this technique is taught as a basic organizing principle in French schools: The French learn to value and practice eloquence from a young age.

Speech synthesis is the artificial production of human speech. A computer system used for this purpose is called a speech computer or speech synthesizer, and can be implemented in software or hardware products. A text-to-speech (TTS) system converts normal language text into speech; other systems render symbolic linguistic representations like phonetic transcriptions into speech.

Chapter 3: ADC and DAC. Most of the signals directly encountered in science and engineering are continuous: light intensity that changes with distance; voltage that varies over time; a chemical reaction rate that depends on temperature, etc. Analog-to-Digital Conversion (ADC) and Digital-to-Analog Conversion (DAC) are the processes that allow digital computers to interact with these everyday ...
