Key Points. Since 1901, the average surface temperature across the contiguous 48 states has risen at an average rate of 0.14Â°F per decade (see Figure 1).

Climate Change Indicators: U.S. and Global Temperature

Covers the significant developments in the field of plant biology, including biochemistry and biosynthesis, genetics, genomics and molecular biology, cell differentiation, tissue, organ and whole plant events, acclimation and adaptation, and methods and model organisms.

Annual Review of Plant Biology | Home

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...
