

motor speech disorders elsevier pdf

Motor speech disorders are a class of speech disorders that disturb the body's natural ability to speak due to neurologic impairments. These neurologic impairments make it difficult for individuals with motor speech disorders to plan, program, control, coordinate, and execute speech productions. Disturbances to the individual's natural ability to speak vary in their etiology based on the ...

22q13 deletion syndrome is a genetic disorder caused by the deletion or disruption of the segment of the long arm of chromosome 22. The characteristic clinical features of this syndrome include delayed expressive speech, autistic behavior and hypotonia, and clinically severe complications associated with autoimmunity are rarely reported.

Auto-immune disorders in a child with PIK3CD variant and

Hypothermia (core temperature < 35.0 Å°C) and hyperthermia (core temperature > 40.5 Å°C) are medical emergencies.. Severely hypothermic patients are at risk of cardiac arrhythmias, including atrial and ventricular fibrillation. â€œ The clinical feature that best differentiates heat stroke from heat exhaustion is a change in mental status.

Thermoregulatory disorders and illness related to heat and

Assessment should include a history of the childâ€™s development, observation, school report and a profile of the childâ€™s strengths and weaknesses.

Autistic Spectrum Disorders: Assessment and Intervention

Schizophrenia is a mental disorder characterized by abnormal behavior and a decreased ability to understand reality. Common symptoms include false beliefs, unclear or confused thinking, hearing voices that others do not, reduced social engagement and emotional expression, and a lack of motivation. People with schizophrenia often have additional mental health problems such as anxiety ...
