weak instrumentation, in spatial econometrics to deal with issues of cross-section dependence, and in auction and industrial organization econometrics to resolve matters of identification. All these fields show an interfacing of theory and practice that is changing the landscape of modern econometrics.

ECONOMETRIC THEORY AND PRACTICE BY PETER C. B. PHILLIPS

The methodology of econometrics is not the study of particular econometric techniques, but a meta-study of how econometrics contributes to economic science. As such it is part ... practice of economics. The naturalistic turn is partly an attempt to realign methodological thinking with that practice.
