Causal determinism is, roughly speaking, the idea that every event is necessitated by antecedent events and conditions together with the laws of nature.

Causal Determinism (Stanford Encyclopedia of Philosophy)

Determinism is the philosophical theory that all events, including moral choices, are completely determined by previously existing causes. Determinism is usually understood to preclude free will because it entails that humans cannot act otherwise than they do. The theory holds that the universe is utterly rational because complete knowledge of any given situation assures that unerring ...

Social determinism is the theory that social interactions and constructs alone determine individual behavior (as opposed to biological or objective factors).. Consider certain human behaviors, such as committing murder, or writing poetry. A social determinist would look only at social phenomena, such as customs and expectations, education, and interpersonal interactions, to decide whether or ...
